• OUR ENVIRONMENTAL POLICY

Aguacates la Bonanza, a company dedicated to the production, packaging, processing, transport and distribution for the export of avocado, considered as industry leaders in the country, is committed to mitigating the environmental impacts generated by its economic activity, oriented by a continuous improvement in the development of activities at the business level.

This means that Aguacates la Bonanza, must comply with all applicable environmental laws and regulations, further ensuring that its operations meet or exceed the expectations of its stakeholders, customers, distributors, suppliers, and collaborators.

In their activities, the operational units of Aguacates la Bonanza should consider the following aspects of great importance:

Avoid environmental pollution by disposition of waste generated and that could have environmental impacts, originating in productive activities.

With the implementation of procedures that favor healthier environments, we comply with environmental regulations, with teamwork, making productions cleaner and more friendly with the environment.

Senior management ensures the implementation of the necessary measures to achieve knowledge and commitment to this environmental policy of all members of the organization and its external collaborators. It also ensures that it is available to any interested party and the general public.

Gustavo Rivas Benitez
